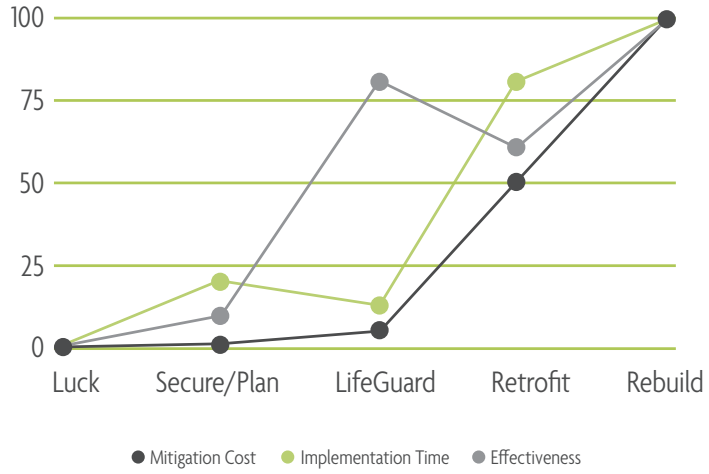
Product Overview

LifeGuard™

- Affordable
- Virtually Indestructible
- Many Configurations
- Customizable
- For Home, School or Office
- Made in the U.S.A.

TYPES OF LIFEGUARDS

- Desks
- Credenzas
- Consoles
- Work Station Inserts
- Conference Tables
- And More...



Experts always say that you should get under a sturdy table or desk during an earthquake or tornado. But are you really going to trust a regular table or desk to save your life?

We didn't. So we built a safety device that can survive a complete building collapse. We disguised it as an every-day item and optionally stock it with everything you need to stay alive, even if your rescue is delayed.

- Most LifeGuards are designed with an internal steel structure that is engineered and proven to support over one million pounds. They will provide protection against falling debris, blasts and high-velocity hazards on any floor.
- The inside is optionally outfitted with heavy padding and handles while providing you with enough room to lie down and stretch out. The steel floor prevents penetration from below.
- Basic necessities may be stored inside the storage wedge. It may be stocked with food, water, emergency lighting, a signaling device, a HEPA-grade breathing mask to filter out heavy dust and asbestos, mylar blankets, and provisions for sanitary waste.
- We have several LifeGuard styles to choose from for the office, school or home, and we can manufacture your custom design at our production facility.

Student Desk

LifeGuard™

SPECIFICATIONS

- Supports over 350,000 pounds
- Floor loading under 1psi
- Weight 125-250 pounds
- Protects 2 students
- Internal handles
- Top penetration approx. 15k pounds
- Side penetration approx. 10k pounds

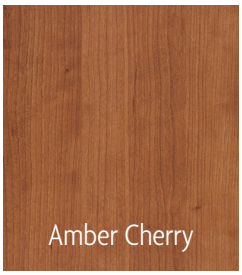
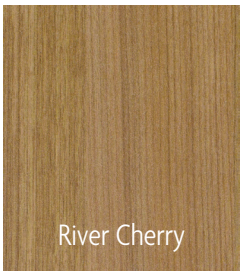
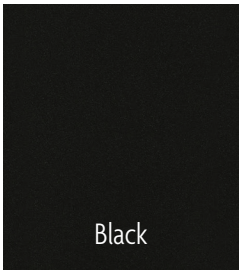
Colors

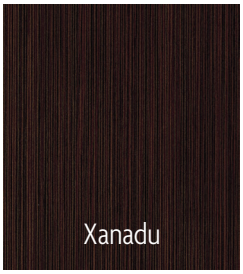
LifeGuard™

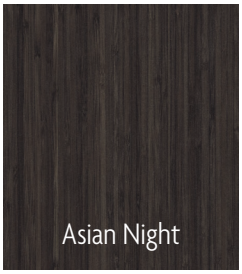
WILSONART LAMINATES











Due to printing limitations, shade may vary from actual product.

POWDER COATING

The standard LifeGuard steel color is Matte Silver. We offer nearly unlimited custom color and texture selections. Please call for more information.

Options

LifeGuard™

DRAWER BOXES - DB

The drawer boxes are removable and replaceable. Need more storage? Add a drawer box. Standard drawer box has three drawers behind two drawer faces and includes a pencil drawer, sundries and file storage. Not available on all units. Drawer boxes may be incompatible with armor. Call for more information.

PADDING SYSTEM - PS

Our fitted padding system protects the occupants from much of the hard surface area inside the LifeGuard. This includes the ceiling, sides, posts and floor. The floor padding is removable for cleaning. Call for more information.

FITTED STORAGE WEDGE - SW

Our storage wedge is perfectly fitted to maximize storage inside the LifeGuard while adding heavy padding for the torso.

SUPPLIES - SP

Stock the LifeGuard with the appropriate level of supplies to ensure survival if an extended wait is possible. Our supply pack contains 21 days of supplies which fits nicely in our Storage Wedge. Supplies include food, water, quality respirator, glow sticks, high performance whistle, mylar blankets, and provisions for sanitary waste.

SLAM DOOR

Some situations require quick seclusion. Our quick locking door design is intended to be rapidly closed with self locking pins. Manual exit from inside and keyed access from the exterior. Door may be upgraded to armor as necessary. The Slam Door is not available on all models or sizes. Please call for more information.

ARMOR

Although the standard LifeGuard offers substantial bullet and blast resistance sufficient to stop a standard .45 Caliber handgun or 12 gauge shotgun, there are situations where more protection is needed. Ballistic Protection up to :

AP1 - NIJ0108.01 Level IIA AP2 - NIJ 0108.01 Level III AP2- UL 752 Level 8

Not all LifeGuard bases are compatible with the armoring system.
Please call for more information.

EXTENDED TOP - ET

The Extended Top can be used for creating a reception desk, a standing desk, or to provide storage above the LifeGuard on an island or worktable - with unlimited design options. Please call for more information.
